

Network Protocol Specialists, LLC will offer two days of Certified Cabling Test Technician (CCTT) Training for the DSX 5000 Series Cable Analyzer on April 19th & April 20th, 2016 in Dorchester, MA

Each day of training qualifies for 7 BiCSi CECs.

Certified Cabling Test Technician (CCTT) Course Highlights

About the Course: Per customer demand, we are expanding the CCTT course into two separate days of training focused upon your specialization – copper or fiber certification. Each day is a powerful one-day course which covers the current standards and provides hands-on training with the DSX Cable Analyzer. You can register for one or both days of CCTT training as follows:

- **Day 1 – DSX-5000 Cable Analyzer testing.** Versiv introduction and common settings; Exporting configuration and results, Copper test limits/standards, Adapter types, Configuring for a twist pair test, Making a measurement and reviewing the result. New test parameters DC Resistance Unbalance, TCL, ELTCTL. DSX diagnostics HDTDX and HDTDR. Single test. Patch cord certification. Alien Crosstalk
- **Day 2 – CertiFiber Pro and OptiFiber Pro testing,** Basic fiber theory, Encircled flux. Configuring the CertiFiber Pro, Fiber inspection, Automated analysis. Setting a reference for a duplex link, LC to LC duplex. Creating a custom test limit. ISO/IEC 14763-3. Understanding how the different connector losses differ from other standards. Setting a reference for a simplex link. SC/APC to SC/APC. OTDR theory, Configuring the OptiFiber Pro, Trace analysis, LinkWare results management

After successful completion of the class, Network Protocol Specialists, LLC will deliver CCTT certificates to the attendees.

Who should attend: The course is designed for contractors and enterprise network owners who currently own or anticipate purchasing DSX series cable certification equipment.

Why attend: The CCTT course provides "expert" level training on the DSX cable analyzer series. Investing in the Fluke Networks Certified Cabling Test Technician program will not only improve installation skills, but also your effectiveness and productivity on the job - testing, certifying and troubleshooting cabling systems.

Time: Each day goes from 8:00am to 5:00pm.

Location: JATC of Greater Boston * 194 Freeport Street * Dorchester, MA 02122

Cost: \$425.00 USD per person per day is due prior to the class. Acceptable forms of payment are credit card or check (other forms of payment with prior approval only). Payment information will be collected by a Network Protocol Specialists' representative via e-mail or phone a few days after completing the online registration.

REGISTER TODAY! Don't delay ... Each class is limited to only 16 students and typically sells out! Register for one or both days of training at http://www.cctttraining.com/?page_id=23 or contact Uta Burley @ 425.433.0777, uta@nps-llc.com
